INSTALLATION & OWNER'S MANUAL

Series: 762

NATIONAL FIREPLACE INSTITUTE NFI CERTIFIED www.nficertified.org — We recommend that our gas hearth products be installed and serviced by professionals who are certified in the U.S. by the National Fireplace Institute® (NFI) as NFI Gas Specialists.

⚠ WARNING: For Outdoor Use Only

ETRUSCAN OUTDOOR FIRE URN

⚠ WARNING: If the information in this manual is not followed exactly, a fire or explosion may result causing property damage, personal injury or loss of life.

- **Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.**
- **A propane cylinder not connected for use shall not be stored in the vicinity of this or any other appliance.**

⚠ DANGER

If you smell gas:

1. **Shut off gas to the appliance.**
2. **Extinguish any open flame.**
3. **If odor continues, keep away from the appliance and immediately call your gas supplier or fire department.**

Installation and service must be performed by an NFI Certified or other qualified professional installer, service agency, or gas supplier.

⚠ DANGER

CARBON MONOXIDE HAZARD

This appliance can produce carbon monoxide which has no odor.

Using it in an enclosed space can kill you.

Never use this appliance in an enclosed space such as a camper, tent, car, or home.

INSTALLER & CONSUMER: These instructions MUST be retained with this appliance for future reference.

Important: Read these instructions carefully before starting installation of the unit.

⚠ WARNING

Improper installation, adjustment, alteration, service, or maintenance can cause property damage, personal injury, or loss of life. Read the installation, operating and maintenance instructions thoroughly before installing or servicing this equipment.

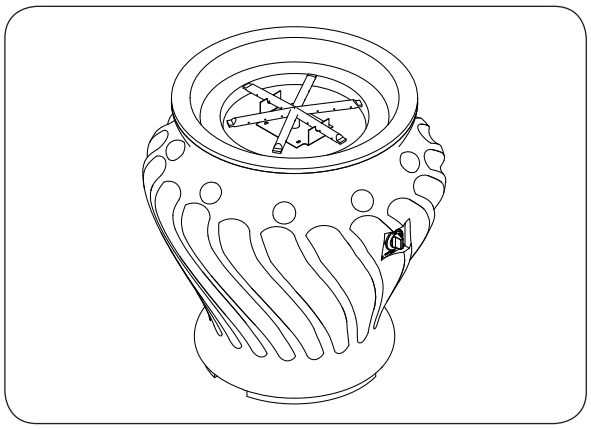

This appliance is designed as an **attended appliance**. Adults **must** be present when the unit is operating. **DO NOT** leave this unit burning when unattended. If this product is left burning unattended, it may cause damage or serious injury.

IMPORTANT

For safe operation and proper performance of this product and to comply with certification, listings, and building code acceptances, use ONLY Peterson AFD controls, parts, and accessories that have been specifically listed or certified for use with this burner system. Use of other controls, parts, or accessories is prohibited and will void all warranties, certifications, listings, and building code approvals, and may cause property damage, personal injury, and loss of life.

CODE AND SUPPLY REQUIREMENTS:

The installation must conform with local codes and ordinances, or, in the absence of local codes, with the latest *National Fuel Gas Code, ANSI Z223.1.*

Series: 762

We recommend that our gas hearth products be installed and serviced by professionals who are certified in the U.S. by the National Fireplace Institute® (NFI) as NFI Gas Specialists.

⚠ AVERTISSEMENT: Pour l'usage extérieur seulement

ETRUSCAN PLEIN FEU URN

⚠ AVERTISSEMENT: Si l'information en ce manuel n'est pas suivie exactement, une incendie ou une explosion peut résulter entraînant des dégats matériels, le dommage corporel ou des pertes humaines.

- **Ne pas entreposer ni utiliser d'essence ou d'autres vapeurs et liquides inflammables à proximité de cet appareil ou de tout autre.**
- **Une bouteille de propane non branchée ne doit pas être entreposée à proximité de cet ou tout autre appareil.**

⚠ DANGER

Si vous sentez une odeur de gaz:

1. **Coupez le gaz à l'appareil.**
2. **Éteindre toute flamme nue.**
3. **Si l'odeur persiste, éloignez-vous de l'appareil et appelez immédiatement votre fournisseur de gaz ou les pompiers.**

L'installation et le service doivent être assurés par un NFI certifié ou toute autre installateur, agence de service, ou fournisseur professionnelle qualifiée de gaz.

⚠ DANGER

DANGER MONOXYDE DE CARBONE

Cet appareil peut produire du monoxyde de carbone n'a pas d'odeur qui.

Son utilisation dans un espace clos peut vous tuer.

Ne jamais utiliser cet appareil dans un espace clos comme une caravane, tente, véhicule ou maison.

d'INSTALLATEUR; CONSOMMATEUR: Ces instructions DOIVENT être maintenues avec cet appareil pour la future référence.

Important: Lisez ces instructions soigneusement avant de commencer l'installation de l'unité.

⚠ AVERTISSEMENT

L'installation, l'ajustement, le changement, le service, ou l'entretien inexact peuvent causer des dégats matériels, le dommage corporel, ou des pertes humaines. Lisez l'installation, l'opération et les instructions d'entretien complètement avant d'installer ou entretenir cet équipement.

Cet appareil est conçu comme appareil occupé. Les adultes doivent être présent quand l'unité fonctionne. Ne laissez pas ce burning d'unité si sans surveillance. Si ce produit est laissé sans surveillance brûlant, il peut causer des dommages ou des dommages sérieux.

IMPORTANT

Pour l'exploitation sûre et l'exécution appropriée de ce produit et pour se conformer à la certification, aux listes, et aux acceptations de codes du bâtiment, commandes, pièces, et accessoires de Peterson d'utilisation SEULEMENT qui ont été spécifiquement énumérés ou certifiés pour l'usage avec ce système de brûleur. L'utilisation d'autres commandes, pièces, ou accessoires est interdite et videra toutes les garanties, certifications, listes, et approbations de codes du bâtiment, et peut causer des dégats matériels, le dommage corporel, et des pertes humaines.

CONDITIONS DE CODE ET D'APPROVISIONNEMENT:
L'installation doit se conformer aux codes locaux et aux ordonnances, ou, en l'absence des codes locaux, au plus défunt code national de gaz de carburant, la *norme ANSI Z223.1.*

IMPORTANT SAFETY INFORMATION

Congratulations on your purchase of an American Fyre Designs outdoor gas fire urn. Made with pride in America, your new fire urn complies with national safety standards and when installed per these instructions and used as intended it will provide warmth and comfort to your outdoor area for many years.

Prior to installation and operation ensure that all specifications, dimensions, and minimum clearances stated in this manual are observed. You must read all warnings and safety information, and understand all of the information in this manual. All installation requirements must be observed and met.

PRE-INSTALLATION AND PREPARATION SAFETY GUIDELINES

A. A shut-off valve (not included) in the gas line is required. It provides for safety when the unit is not in use and for convenient maintenance and repair. It must be installed within 6 feet of unit. Use a pipe joint compound resistant to all gasses on all male fittings except flare fittings.

B. Before installing this unit, check the MINIMUM CLEARANCE TO COMBUSTIBLES section to ensure that the surrounding area is **properly sized for the installation.**

C. The unit is for outdoor use only. **DO NOT** install or use this appliance inside a building, garage, or any other enclosed area, including recreational vehicles and/or boats. **THIS UNIT MUST BE INSTALLED IN SUCH A MANNER THAT ALL VENT OPENINGS ON THE UNIT REMAIN CLEAR AND FREE OF ALL OBSTRUCTIONS AT ALL TIMES AND DURING ALL WEATHER CONDITIONS.**

D. SOLID FUEL MUST NOT BE BURNED in the unit.

E. CHECK GAS TYPE (natural gas or propane): The gas supply you intend to use may not be the same as that stated on the unit rating plate as purchased. If the gas supply is different, **convert the unit to the gas type you intend to use (IF PERMITTED).** See the FUEL CONVERSION KIT section and contact the dealer for assistance.

F. FOR NATURAL GAS: The minimum inlet gas-supply pressure for purposes of input adjustment is **5"** water column (w.c.), and the maximum inlet gas-supply pressure is **10.5 "** w.c.
FOR PROPANE GAS: The minimum inlet gas-supply pressure for purposes of input adjustment is **11"** w.c., and the maximum inlet gas-supply pressure is **13"** w.c. **DO NOT INSTALL THIS UNIT IF MINIMUM PRESSURE IS NOT AVAILABLE OR IF MAXIMUM PRESSURE IS EXCEEDED.**

G. The gas piping system must be sized to provide minimum inlet pressure at the maximum flow rate (BTU/hr). Undue pressure loss will occur if the pipe is too small, or the run is too long. Gas supply pipe must be $1/2$" minimum interior diameter. If the gas line is longer than 20', a larger diameter line may be necessary. Refer to the NFPA 54 guidelines for further details.

H. For installations at elevations above 2,000 ft., contact your local dealer or gas supplier before installing. Input ratings should be reduced approximately 4% for each 1,000 ft. above sea level. Refer to the National Fuel Gas Code.

I. The unit and its individual shut-off valve must be disconnected from the gas-supply piping system during any pressure testing of that system at test pressures in excess of $1/2$ psi (3.5 kPa). This is accomplished by closing the gas-supply line valve. The unit must be isolated from the gas-supply piping system by closing its individual manual shut-off valve during any pressure testing of the gas-supply piping system at test pressures equal to or less than $1/2$ psi (3.5 kPa).

J. When an appliance is for connection to a fixed piping system, the installation must conform with local codes, or in the absence of local codes with the National Fuel Gas Code, ANSI Z223.1/NFPA 54; International Fuel Gas Code, Natural Gas and Propane Installation Code, CSA B149.1; or Propane Storage and Handling Code, B149.2, as applicable.

K. INSTALLER NOTE: This unit should be installed so that it can be removed if service is required.

L. GAS-SUPPLY PLUMBING REQUIREMENTS

Apply only joint compounds that are resistant to all gasses on all male pipe fittings. Make sure to tighten every joint securely. Do not use pipe joint compound to connect flare fittings. Bring the gas-supply pipe up from beneath the enclosure near its center (if applicable).

CAUTION: Installation and maintenance must be done by an NFI Certified or other qualified professional service technician. Installer, read these instructions before installing this product. Be sure you understand all safety precautions and warnings contained in this manual.

INSTALLATION SAFETY GUIDELINES

A. Carefully inspect for shipping damage. If any parts are damaged, contact your dealer.

B. Installation and repair should be done by a qualified professional service technician. The appliance should be inspected before use and at least annually by a qualified service person. More frequent cleaning may be required as necessary. It is imperative that control compartment, burners and circulating air passageways of the appliance are kept clean.

C. WEAR GLOVES AND USE EXTREME CAUTION WHENEVER INSTALLING AND HANDLING THIS PRODUCT AND ITS ACCESSORIES AS CERTAIN COMPONENTS HAVE SHARP EDGES THAT CAN CAUSE PERSONAL INJURY.

D. Correct installation and proper placement of the unit and decorative media **is crucial** to the safe performance of the unit. See installation instructions for further information.

E. DO NOT install the unit under any overhead combustible materials that are less than 8 feet above the top of the unit.

F. Ensure that the unit is installed on a hard and level surface.

G. Ensure that the unit is installed in such a manner that all vent openings on the unit remain clear and free of all obstructions at all times and during all weather conditions.

H. Due to high temperatures, the unit must be located out of traffic areas and away from combustibles.

OPERATING THE UNIT SAFELY AND CORRECTLY

A. This product is a decorative gas appliance. It is not a cooking appliance.

B. SOLID FUEL MUST NOT BE BURNED in the unit.

C. When shutting the unit down—be sure to TURN THE CONTROL VALVE FULLY OFF.

D. Children MUST be supervised when they are in the area of this appliance.

E. DO NOT sit or place any part of the body, clothing, or other flammable materials on or near the unit surround. Children and adults should be alerted to the hazard of high surface temperatures and should stay away to avoid burns or clothing ignition. **DO NOT** lean over the unit when lighting or when in use.

F. Every time you use the unit, **make sure that**:

1. The area around the unit is clear and free from combustible materials, gasoline and other flammable vapors and liquids.
2. There is no blockage of the airflow through the vent openings located on the unit.
3. The hose is inspected (if applicable). See the SAFE USE & MAINTENANCE OF PROPANE-GAS CYLINDERS section.

G. WARNING: HOT WHILE IN OPERATION AND FOLLOWING OPERATION. Serious injury can occur! DO NOT throw trash, paper, or other flammable materials onto the unit. **DO NOT** leave in operation when unattended.

WARNING: DO NOT operate this unit in the rain.

WARNING: DO NOT operate this unit in high-wind conditions. Operating in high-wind conditions may expose your unit to direct flame, which will result in cracking and discoloration to the finish.

H. DO NOT continue using if you smell unusual odors, or have headaches, nausea, or dizziness.

I. DO NOT store any combustible materials, gasoline, and any other flammable vapors/liquids in the vicinity of the unit. Provide adequate clearance for servicing and operation.

J. Matches, paper, garbage, or any other material must not be thrown onto the unit or into the flame.

K. DO NOT use the unit if any part of it has been underwater. Immediately call a qualified professional service technician to inspect the unit and to replace any part of the control system and any gas control that has been underwater.

UTILISATION SÛRE ET ENTRETIEN DES CYLINDRES DE GAZ DE PROPANE

IMPORTANT POUR VOTRE SÛRETÉ

LISEZ ET SUIVEZ TOUS LES AVERTISSEMENTS ÉQUIPÉS DE VOTRE CYLINDRE DE GAZ DE PROPANE.

En actionnant cet appareil avec un cylindre de gaz de propane ON DOIT observer ces instructions et avertissements.

LE MANQUE DE FAIRE AINSI PEUT AVOIR COMME CONSÉQUENCE UNE INCENDIE OU UNE EXPLOSION SÉRIEUSE.

CYLINDRE ET CONDITIONS ET CARACTÉRISTIQUES DE CONNECTEUR

a. Des cylindres et les valves de gaz de propane doivent être maintenus en bon état et doivent être remplacés s'il y a des dommages évidents au cylindre ou à la valve.

b. Ce gril, une fois utilisé avec un cylindre, devrait être relié à un gallon de la norme 5 (20lb.) cylindre de gaz de propane équipé d'un OPD (remplissez au-dessus du niveau le dispositif d'empêchement). L'OPD a été exigé sur tous les cylindres vendus depuis octobre 1.1998 pour empêcher le remplissage excessif.

c. Les dimensions de cylindre devraient être approximativement 12"(30.5cm) de diamètre et 18" (45.7cm) hauts. Des cylindres doivent être construits et marqués selon les caractéristiques pour des cylindres de gaz de propane du département des ETATS-UNIS du transport (D.O.T.) ou le niveau national du Canada, du CAN/CSA-B339, des cylindres, des sphères et des tubes pour le transport des marchandises dangereuses.

d. Le cylindre doit inclure un collier pour protéger la valve de cylindre et le circuit d'alimentation de cylindre doit être assuré le retrait de vapeur.

e. Le montage du régulateur de pression et le flexible (Fig. 6-1) fourni avec cet appareil au gaz en plein air (modèles au propane seulement) doit être utilisé. Assemblées d'origine et régulateur de pression et le tuyau de remplacement doivent être ceux spécifiés par le fabricant pour le raccordement d'un dispositif de cylindre de liaison identifiée comme de type I par le ANSI Z 21.58/CGA 1.6 (voir liste des pièces pour les informations de commande).

f. La valve de cylindre de gaz de propane doit être équipée d'un dispositif d'accouplement de raccordement de cylindre, décrit comme type I dans la norme définie dans le e. de paragraphe ci-dessus. Ce dispositif est généralement décrit comme coupleur rapide de fil de point culminant.

g. Si votre cylindre de gaz de propane vient avec une prise de la poussière, placez le bouchon anti-poussière sur la sortie de valve de cylindre toutes les fois que le cylindre n'est pas en service.

OPÉRATION DE COUPLEUR RAPIDE

Pour relier le regulator/hose à l'ajustage de précision de valve de cylindre de gaz de propane: Serrez l'écrou de main sur le régulateur au-dessus de l'ajustage de précision de fil de point culminant sur la valve de cylindre. Tournez l'écrou de main dans le sens des aiguilles d'une montre pour engager les fils et pour serrer jusqu'à ce que douillettement. L'utilisation des pinces ou de la clé ne devrait pas être nécessaire. Seulement le propane marqué par cylindres doit être employé.

Pour débrancher: Tournez l'écrou de main dans le sens contraire des aiguilles d'une montre jusqu'à isolé (fig. 6-1).

Important: Avant d'employer le gril, et ensuite chaque fois que le cylindre est enlevé et rattaché, examinez tous les raccordements pour déceler les fuites. Arrêtez les valves de gril et ouvrez la valve principale de cylindre, puis vérifiez les raccordements avec de l'eau savonneux. Réparez toutes les fuites avant d'allumer le gril.

ATTENTION: Tournez toujours la valve principale de cylindre de propane au loin après chaque utilisation, et avant de déplacer le gril et le cylindre, ou débrancher l'accouplement. Cette valve doit rester fermée et le cylindre a débranché alors que l'appareil n'est pas en service, quoique l'écoulement de gaz soit arrêté par un dispositif de sûreté quand le coupleur est débranché.

Inspectez soigneusement l'ensemble de tuyau chaque fois avant que le gaz soit allumé. Un tuyau fissuré ou effiloché doit être immédiatement remplacé.

Si l'appareil est stocké à l'intérieur, le cylindre doit être disconnected et a enlevé. Des cylindres Disconnected doivent être stockés dehors, hors de la portée des enfants, avec les prises de valve filetées étroitement installées, et ne doivent pas être stockés dans un bâtiment, le garage, ou n'importe quel autre secteur inclus.

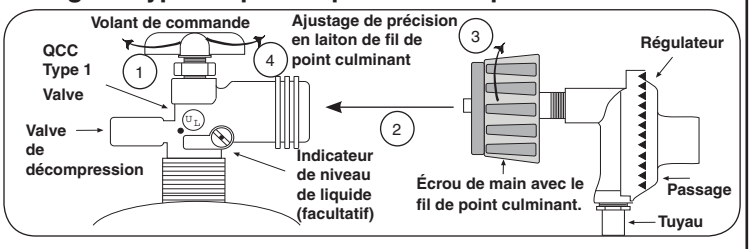

POUR VOTRE SÛRETÉ

a. Ne stockez pas un cylindre de gaz disponible de propane dessous ou ne vous approchez pas de cet appareil.

b. Ne remplissez jamais cylindre au delà de 80 pour cent de plein.

c. SI L'INFORMATION DANS "A" ET "B" N'EST PAS SUIVIE EXACTEMENT, UN FEU CAUSANT LA MORT OU DES DOMMAGES SÉRIEUX PEUT SE PRODUIRE.

Fig. 6-1 type coupleur rapide de fil de point culminant d'l

SAFE USE & MAINTENANCE OF PROPANE GAS CYLINDERS

IMPORTANT FOR YOUR SAFETY

READ AND FOLLOW ALL WARNINGS PROVIDED WITH THE PROPANE-GAS CYLINDER.

When operating this appliance with a propane-gas cylinder, these instructions and warnings **MUST** be observed.

FAILURE TO DO SO MAY RESULT IN A SERIOUS FIRE OR EXPLOSION.

CYLINDER/CONNECTOR REQUIREMENTS

a. Propane-gas cylinders, valves, and hoses must be maintained in good condition and must be replaced if there is visible damage to either the cylinder or valve. If the hose is cut or shows excessive abrasion or wear, it must be replaced before using the gas appliance (see **e**.).

b. This unit, when used with a cylinder, should be connected to a standard 5-gallon (20 lb.) propane-gas cylinder equipped with an OPD (Overfill Prevention Device). The OPD has been required on all cylinders sold since October 1,1998, to prevent overfilling.

c. Cylinder dimensions should be approximately 12" (30.5 cm) in diameter and 18" (45.7 cm) high. Cylinders must be constructed and marked in accordance with the *Specifications for Propane Gas Cylinders of the U.S. Department of Transportation (D.O.T.)* or the National Standard of Canada, *CAN/CSA-B339, Cylinders, Spheres, and Tubes for Transportation of Dangerous Goods.*

d. The cylinder used must include a collar to protect the cylinder valve, and the cylinder supply system must be arranged for vapor withdrawal.

e. The pressure regulator and hose assembly (Fig. 7-1) *supplied* with this outdoor gas appliance (L.P. models only) must be used. Original and replacement pressure regulator and hose assemblies must be those specified by the manufacturer for connection with a cylinder connecting device identified as Type I by the *ANSI Z 21.58/CGA 1.6* (see PARTS LIST for ordering information).

f. The propane-gas cylinder valve must be equipped with a cylinder connection coupling device, described as Type I in the standard defined in paragraph **e**. above. This device is commonly described as an Acme thread quick coupler.

g. If the propane-gas cylinder comes with a dust plug, place the dust cap on the cylinder valve outlet whenever the cylinder is not in use.

QUICK COUPLER OPERATION

To connect the regulator/hose assembly to the propane-gas cylinder valve fitting: Press the hand nut on the regulator over the Acme thread fitting on the cylinder valve. Turn the hand nut clockwise to engage the threads and tighten until snug. The use of pliers or a wrench should not be necessary. Only cylinders marked “propane” may be used.

To disconnect: Turn the hand nut counterclockwise until detached (Fig. 7-1).

Important: Before using the unit, and after each time the cylinder is removed and reattached, check the hose for wear (see **a**.) and check all connections for leaks. Turn off the unit valves and open the main cylinder valve, then check connections with soapy water. Repair any leaks before lighting the unit.

CAUTION: Always turn the propane cylinder main valve off after each use, and before moving the unit and cylinder or disconnecting the coupling. This valve must remain closed and the cylinder disconnected while the appliance is not in use, even though the gas flow is stopped by a safety feature when the coupler is disconnected.

Carefully inspect the hose assembly each time before the gas is turned on. A cracked or frayed hose must be replaced immediately.

If the appliance is stored indoors, the cylinder must be disconnected and removed. Disconnected cylinders must be stored outdoors, out of the reach of children, with threaded valve plugs tightly installed, and must not be stored in a building, garage, or any other enclosed area.

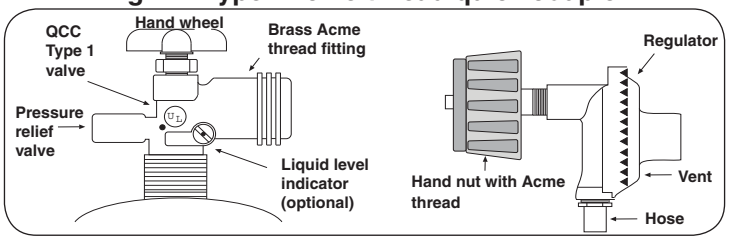

FOR YOUR SAFETY

a. DO NOT store a spare propane-gas cylinder under or near this appliance.

b. NEVER fill the cylinder beyond 80-percent full.

c. IF THE INFORMATION IN **a.** AND **b.** IS NOT FOLLOWED EXACTLY, A FIRE CAUSING DEATH OR SERIOUS INJURY MAY OCCUR.

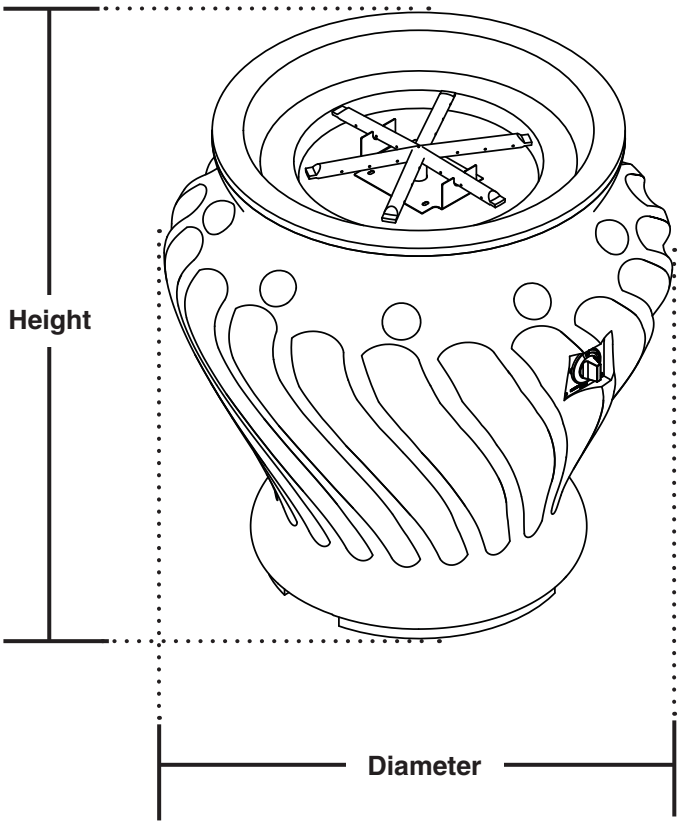

Fig. 7-1 Type I Acme thread quick coupler

SPECIFICATIONS AND DIMENSIONS

Style	BTUs		Dimensions	Weight
	Nat.	L.P.		
Etruscan Fire Urn (762)	60,000	50,000	26.5" dia. x 27" h	150 lbs

Table 1 - Product Specifications

Only the decorative media options listed below are approved for use with this product. Follow the recommendations for media amounts. All decorative media options are purchased separately; contact your local American Fyre Designs dealer when ordering.

PRIMARY MEDIA OPTIONS

When using lava media:

Style	Recommended Amount of Granules / Coals
Etruscan Fire Urn (762)	15 lbs

Table 2 - Lava Recommendations

When using glass media:

Style	Recommended Amount of Glass / Gems
Etruscan Fire Urn (762)	30 lbs

Table 3 - Glass Recommendations

SECONDARY MEDIA OPTIONS

Secondary options such as volcanic stones / wood chunks / and glass nuggets (purchased separately) may also be placed on top of the lava or glass media.

Note: *When using volcanic stones, use VS-12 (12 lbs).*

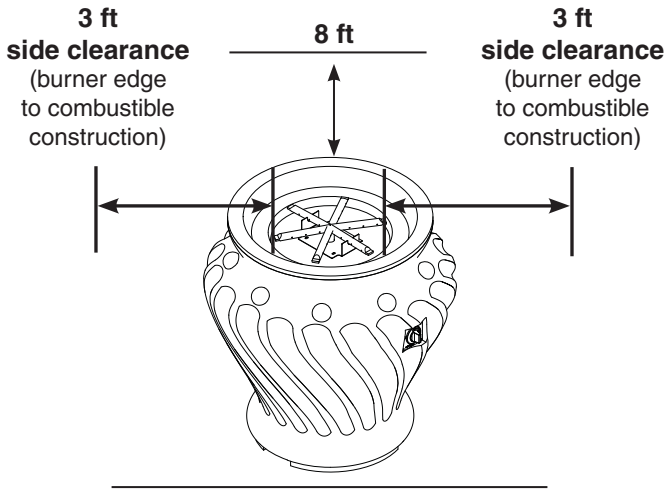

MINIMUM CLEARANCES TO COMBUSTIBLES

The dimensions shown below are **MINIMUM CLEARANCES** to maintain when you install the unit.

ALL CLEARANCES AND INFORMATION STATED HERE MUST BE MAINTAINED AND FOLLOWED.

Description	Dimension
Side clearance (from burner edge to combustible construction)	3 ft
Clearance above unit	8 ft
Clearance below unit	0"

Table 4 - Minimum Clearances to Combustibles

Floor must be a hard, level surface. Combustible materials permitted.

TOOLS REQUIRED

The following are the minimum tools required for the installation of your unit. Additional tools may be required for your individual installation.

- 2 (or more) assemblers recommended
- appropriate tools for gas supply install

PARTS LIST

- In addition to the appropriate Replacement Parts List, reference the Identification Parts List.
- Your unit is packaged onto 1 pallet.
- Decorative media is purchased and packaged separately. Various styles are available.
- Decorative media and replacement parts can be ordered from your local American Fyre Designs dealer.
- Select models are illustrated (your model may vary)

IMPORTANT

Remove all packing material (including any protective coatings) and discard prior to use.

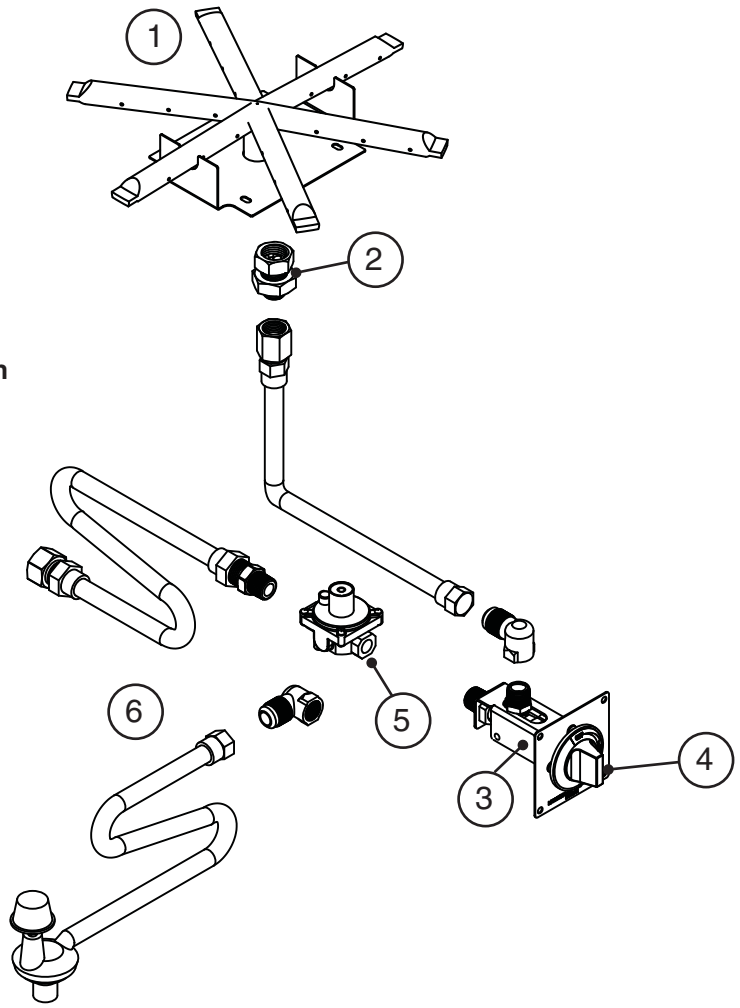

SOME COMPONENTS ARE HEAVY

IMPORTANT SAFETY INFORMATION

BE CAREFUL

If not installed and used correctly per these instructions, this product can cause serious injury.

CAUTION: Installation and maintenance must be done by an NFI Certified or other qualified professional service technician. Read these instructions before installing this unit. Be sure you understand all safety precautions and warnings contained in this manual.

A. FOR OUTDOOR USE ONLY.

B. When shutting the unit down—be sure to **TURN THE CONTROL VALVE FULLY OFF.**

C. WARNING: CARBON MONOXIDE POISONING MAY LEAD TO DEATH. DO NOT MODIFY THIS UNIT OR ITS CONTROLS, EXCEPT AS PROVIDED FOR IN THIS MANUAL. Any other change may be dangerous. Improper installation or use of the unit can cause serious injury or death from fire, burns, explosions, or carbon monoxide poisoning.

D. Check state and local codes to determine if the unit is permitted in your locality before installation.

E. The manual valve allows for an adjustable flame height. THESE SETTINGS MUST ALWAYS BE HIGH ENOUGH FOR THE FLAME TO BE CLEARLY VISIBLE. WHEN LIGHTING THE UNIT, ALWAYS LIGHT ON HIGH.

FIRE URN INSTALLATION

BEFORE YOU BEGIN

Important: Prior to installation ensure that all specifications, dimensions, and minimum clearances stated in this manual are observed. You must read all warnings and safety information, and understand all of the information in this manual. All installation requirements must be observed and met.

WARNING: Failure to position the parts in accordance with these diagrams or failure to use only parts specifically approved with this appliance may result in property damage or personal injury.

- Confirm the installation site accommodates the unit per the requirements in this manual.
- Be sure the gas supply (propane or natural) is turned off at its source.
- Remove all packing material (including any protective coatings) and discard prior to installation.

LOCATION

While following all requirements and safety information in this manual (see MINIMUM CLEARANCES TO COMBUSTIBLES section); determine and prepare the location of the unit (a hard and level surface).

Note: For fire urns, a combustible surface is permitted.

Important: The gas supply must be considered when determining the location of the unit. See CONNECT GAS SUPPLY section for details (if applicable).

HANDLING OF THE UNIT REQUIRES TWO OR MORE PEOPLE.

EXERCISE EXTREME CARE DURING ASSEMBLY AND INSTALLATION.

CONNECT GAS SUPPLY

Important: **Before installation,** be sure the gas supply (propane or natural) is turned off at its source.

To access the interior of the urn:

Carefully lift the lid off of the base.

Note: The lid with burner assembly comes pre-installed to the control valve. When performing any gas connections, it may require the assistance of a second person to hold the lid up from the base. Alternatively, the burner assembly can be disconnected from the flex connector and stored in a safe location (see Fig. 15-1).

To Connect To a Propane Cylinder:

1. Carefully insert a propane cylinder (not included) inside the base of the unit through the top opening . See Fig. 15-1 and Fig. 15-2.
2. Locate the regulator hose assembly that is already installed on the rear of the valve assembly.
3. Attach the regulator end of the hose assembly to the propane cylinder and tighten (see Fig. 15-3).
4. Re-connect the lid with burner assembly to the flex connector <u>if it was disconnected.</u>

To Connect To a Natural or Household Propane Gas Supply:

1. Bring the gas supply pipe up from beneath the unit, or through the side of the unit. **<u>Observe the National Fuel Gas Code and all local codes.</u>**

Note: The gas supply or another flex can also be routed through the side of the unit (through a ventilation opening at the floor).

Important: **Locate the gas supply line out of pathways where people may trip over it or in areas where the line may be subject to accidental damage (if applicable).**

Note: **A shut-off valve (not included) in the gas line is required.** It must be installed within 6 feet of the unit. Use a pipe joint compound resistant to all gasses on all male fittings except flare fittings. See Fig. 15-4 for an example.

2. ***If shut-off valve is connected to end of gas supply stub:***
   - Connect the flex connector to the shut-off valve (see Fig. 15-4). Tighten securely.

   If shut-off valve is installed in-line:
   - Install the supplied flare adapter to the gas supply using a pipe joint compound resistant to all gasses (see Fig. 15-4). Tighten securely.
   - Connect the flex connector to the flare adapter (see Fig. 15-4). Tighten securely.
3. Re-connect the lid with burner assembly to the flex connector <u>if it was disconnected.</u>

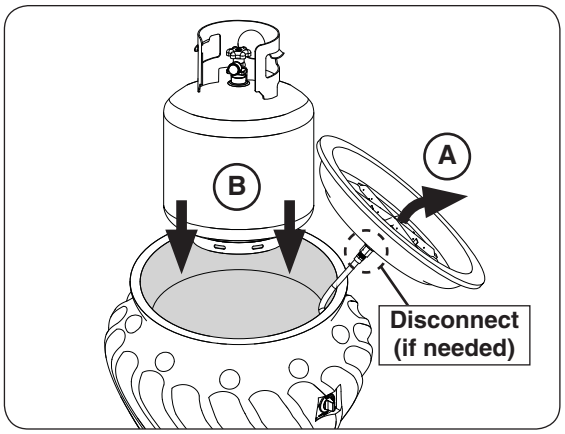

Fig. 15-1 Insert L.P. cylinder

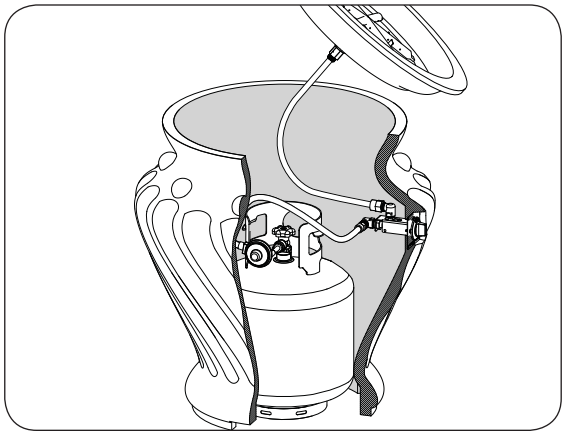

Fig. 15-2 L.P. Cylinder placement

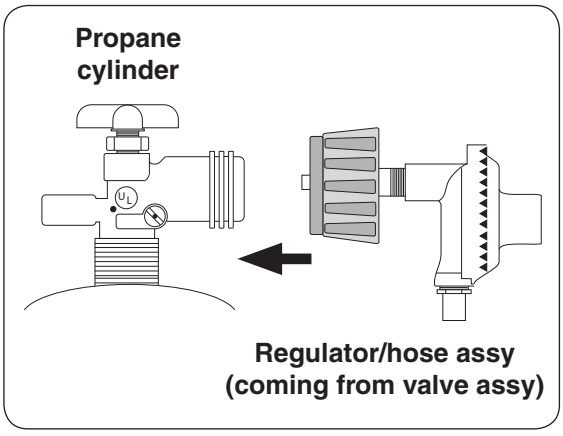

Fig. 15-3 Connecting to an L.P. cylinder

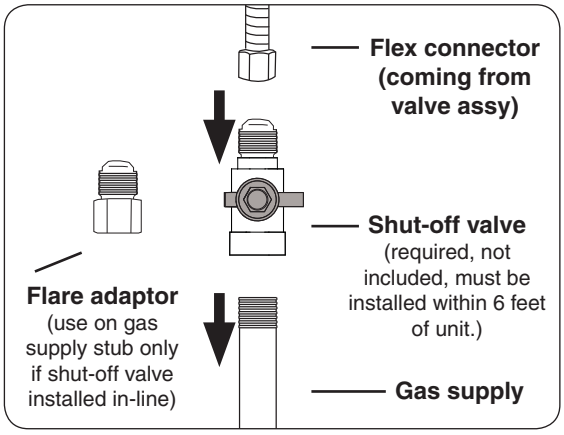

Fig. 15-4 Connecting to a gas line

LEAK TEST

Turn on the gas supply, and test at all connections for leaks using a soapy water solution. If bubbles appear, a leak is present. Turn off the gas and tighten at all connections. Repeat until no leaks are present. If a leak persists, turn off the gas supply and contact the local gas company or dealer. **NEVER USE A FLAME TO CHECK FOR LEAKS.**

REPLACE LID WITH BURNER ASSEMBLY

Replace the lid (that was previously removed during the assembly section). Ensure the lid rests securely in place (see Fig. 16-1).

LIGHTING TEST

Prior to proceeding with installation, perform a lighting test (see lighting instructions for lighting your burner).

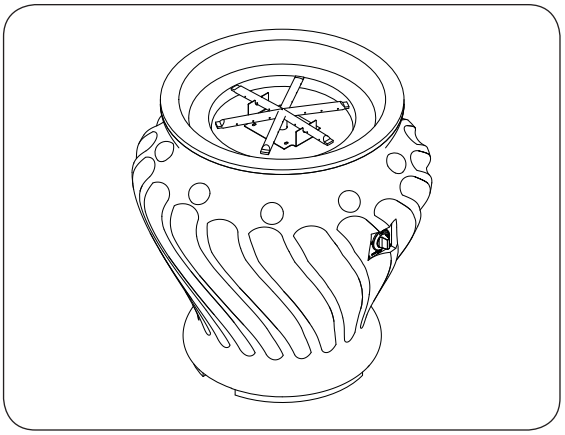

Fig. 16-1 Replace lid w/ burner assembly

DECORATIVE MEDIA PLACEMENT

WARNING: Failure to position the parts in accordance with these diagrams or failure to use only parts specifically approved with this appliance may result in property damage or personal injury.

CAUTION: Be sure the unit and the decorative media are completely cool anytime the media is handled. **Wear gloves whenever installing and handling as certain media may have sharp edges that can cause personal injury.**

This unit has several options for decorative media. The decorative media is purchased and packaged separately. Contact your local American Fyre Designs dealer for ordering information. Locate the section(s) below that apply to your option(s) chosen and install accordingly.

Reference the SPECIFICATIONS AND DIMENSIONS section for details on the recommended amounts of media.

LAVA MEDIA

Pour the lava granules or lava coals evenly into the burner area (see Fig. 17-1). The lava should be 1-2" above the burner.

Important: DO NOT exceed a height of 2" above the burner when placing lava media. Store any excess media in a safe location.

VOLCANIC STONES

1. Volcanic stones first require lava granules to be placed as a base. See above LAVA MEDIA section to place the granules, then proceed to step 2.
2. Pour the volcanic stones evenly into the burner area (see Fig. 17-2). The stones may form a mound. **Store any excess media in a safe location.**

GLASS MEDIA

Pour the glass media (glass, gems, nuggets) evenly into the burner area (see Fig. 17-3). The glass media should be 1-2" above the burner.

Note: If desired, lava granules may first be used as a base, followed by the glass.

Important: DO NOT exceed a height of 2" above the burner when placing glass / lava media. Store any excess media in a safe location.

Fig. 17-1 Lava media option

Fig. 17-2 Volcanic stones option

Fig. 17-3 Glass option

OPTIONAL COVERS

OPTIONAL GFRC COVER

An optional GFRC cover is available to protect your unit when not in use. Contact your local dealer for ordering information.

To install the cover, allow the unit to cool completely, then place as shown in Fig. 18-1.

Note: Certain decorative media (such as volcanic stones, etc.) may interfere with the proper placement of the cover. They will need to be removed and stored in a safe location when the cover is in use.

Remove cover before use.

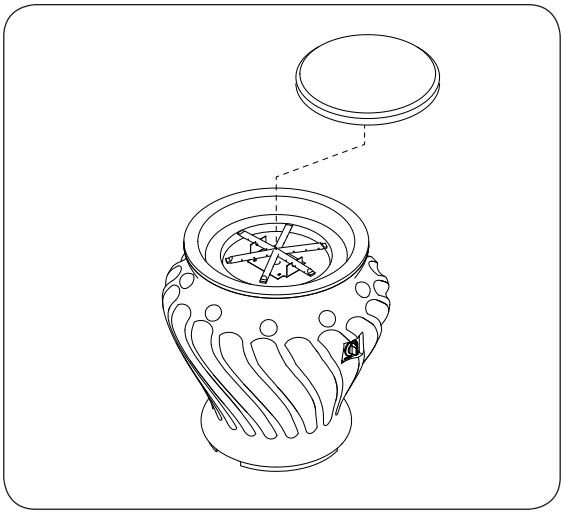

Fig. 18-1 GFRC cover placement

OPTIONAL FABRIC COVER

An optional fabric cover is available to protect your unit when not in use. Contact your local dealer for ordering information.

To install, allow the unit to cool completely, then place the cover over the unit with the American Fyre Designs logo facing upward. See Fig. 18-2.

Follow all instructions provided with the fabric cover.

Note: Certain decorative media (such as volcanic stones, etc.) may interfere with the proper placement of the cover. They will need to be removed and stored in a safe location when the cover is in use.

Remove cover before use.

Fig. 18-2 Fabric cover option

LIGHTING INSTRUCTIONS - CONTROL KNOB MODELS

FOR YOUR SAFETY, READ BEFORE LIGHTING

WARNING: IF YOU DO NOT FOLLOW THESE INSTRUCTIONS EXACTLY, A FIRE OR EXPLOSION MAY RESULT, CAUSING PROPERTY DAMAGE, PERSONAL INJURY, OR LOSS OF LIFE.

A. BEFORE LIGHTING, smell all around the unit area for gas. Be sure to smell next to the floor, because some gas is heavier than air and will settle on the floor.

B. WHAT TO DO IF YOU SMELL GAS

1. Shut off the gas to the appliance.
2. Extinguish any open flame.
3. If odor continues, immediately call your gas supplier or the fire department.

C. Use only your hand to push in or turn the gas control knob. Never use tools. If the knob will not push in or turn by hand, **DO NOT** try to repair it. Call a qualified professional service technician. Force or attempted repair may result in fire or explosion.

---

1. **STOP!** Read the safety information above.
2. Ensure the gas control knob is in the **OFF** position before beginning lighting sequence.
3. Lay a lighted long-stem match on the surface of the decorative media near the burner (**do not hold the match in your hand)** or use a lighted long-necked butane lighter (Fig. 19-1).
4. **Once the match is burning and in position,** depress the gas control knob and turn it counter-clockwise to the **HI LIGHT** position (see Fig. 19-2). Your burner should light.

WARNING: If the burner does not light within five (5) seconds of turning the control knob, immediately depress the control knob and turn clockwise to the **OFF** position.

Wait approximately five (5) minutes to clear out any gas, and repeat steps 3-4 above.

If your burner fails to light again, depress the control knob and turn clockwise to the OFF position and contact your dealer or gas supplier.

Note: The flame height can be adjusted via the control knob.

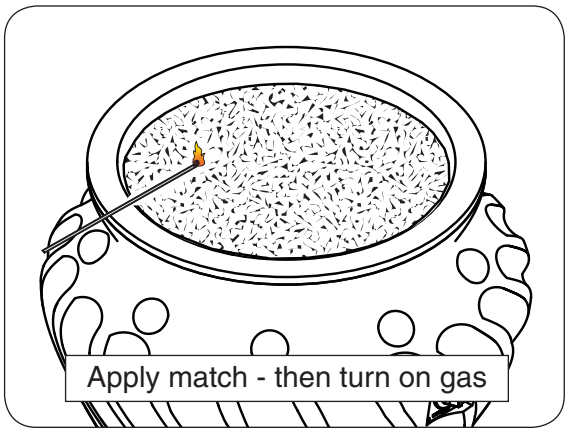

Fig. 19-1

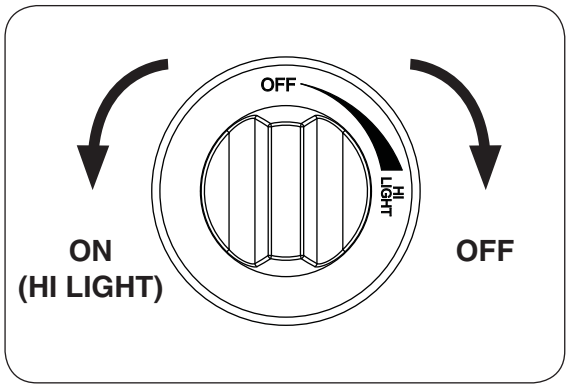

Fig. 19-2

TO SHUT OFF GAS TO THE APPLIANCE

To extinguish your gas burner, depress the gas control knob and turn it clockwise to the **OFF** position (see Fig. 19-2). Be sure the control knob is turned fully off to avoid any gas leakage.

INSTRUCTIONS D'ALLUMAGE - MODÈLES DE BOUTONS DE CONTRÔLE

POUR VOTRE SÉCURITÉ, LIRE AVANT D'ALLUMER

AVERTISSEMENT: SI VOUS NE SUIVEZ PAS CES INSTRUCTIONS À LA LETTRE, UN INCENDIE OU UNE EXPLOSION POURRAIENT S'ENSUIVRE, CAUSANT DES DOMMAGES MATÉRIELS, DES BLESSURES OU DES PERTES DE VIE.

A. AVANT D'ALLUMER, sentez tout autour de l'unité de surface pour le gaz. Assurez-vous de sentir près du plancher, car certains gaz sont plus lourds que l'air et se déposent sur le sol.

B. QUE FAIRE SI UNE ODEUR DE GAZ

1. Coupez le gaz à l'appareil.
2. Éteindre toute flamme nue.
3. Si l'odeur persiste, appelez immédiatement votre fournisseur de gaz ou le service des incendies.

C. N'utilisez que votre main pour enfoncer ou tourner le bouton de contrôle du gaz. Ne jamais utiliser d'outils. Si le bouton ne sera pas enfoncer ou à tourner à la main, NE PAS essayer de le réparer. Appelez un technicien de service qualifié. Force ou une tentative de réparation pourrait provoquer un incendie ou une explosion.

---

1. **ARRÊT!** Lire les consignes de sécurité ci-dessus.
2. S'assurer que le bouton de contrôle du gaz est en position **OFF (éteindre)** avant de séquence d'éclairage à partir la position.
3. Posez une lumineuse à longue tige match sur la surface du support de décoration à proximité de l'anneau brûleur (**ne tenez pas le match en main**) ou utiliser un briquet au butane allumée au long cou (Fig. 20-1).
4. **Une fois que le match est en feu et en position,** appuyer sur le bouton de contrôle du gaz et tournez dans le sens antihoraire à la position de **HI LIGHT (allumer)** (voir Fig. 20-2). Votre brûleur devrait s'allumer.

AVERTISSEMENT: Si le brûleur ne se allume pas la lumière dans les cinq (5) secondes de tourner le bouton de commande, appuyez immédiatement sur le bouton de commande et tournez dans le sens horaire à la position **OFF (éteindre)**.

Attendez environ cinq (5) minutes pour laisser échapper tout le gaz, et répétez les étapes 3-4 ci-dessus.

Si votre brûleur ne s'allume pas, appuyer sur le bouton de commande et tournez dans le sens horaire à la position OFF (éteindre) et contactez votre revendeur ou fournisseur de gaz.

Note: La hauteur des flammes peut être réglée via le bouton de commande.

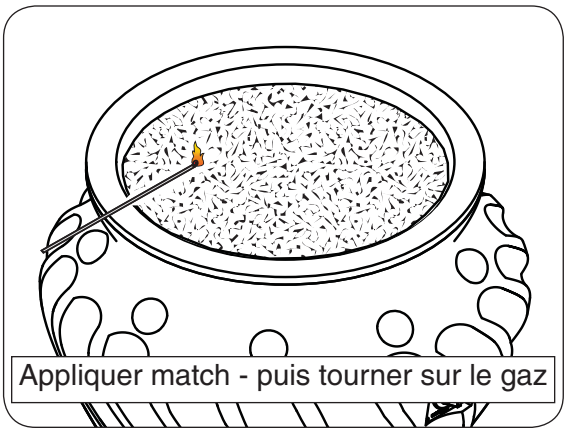

Fig. 20-1

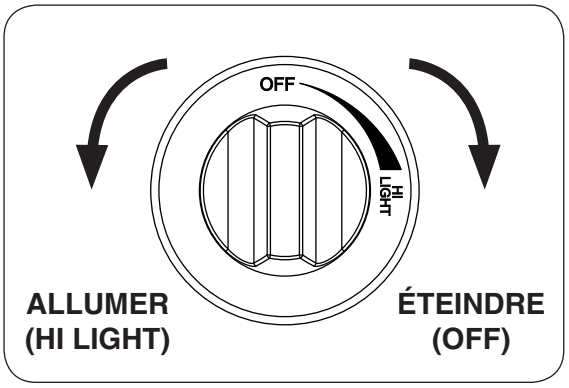

Fig. 20-2

POUR ARRÊTER LE GAZ À L'APPAREIL

Pour éteindre le brûleur à gaz, appuyer sur le bouton de contrôle du gaz et tourner dans le sens horaire à la position **OFF (éteindre)** (voir Fig. 20-2). Assurez-vous que le bouton de commande est tourné complètement hors tension pour éviter toute fuite de gaz.

LIGHTING INSTRUCTIONS - KEY VALVE MODELS

FOR YOUR SAFETY, READ BEFORE LIGHTING

WARNING: IF YOU DO NOT FOLLOW THESE INSTRUCTIONS EXACTLY, A FIRE OR EXPLOSION MAY RESULT, CAUSING PROPERTY DAMAGE, PERSONAL INJURY, OR LOSS OF LIFE.

A. BEFORE LIGHTING, smell all around the unit area for gas. Be sure to smell next to the floor, because some gas is heavier than air and will settle on the floor.

B. WHAT TO DO IF YOU SMELL GAS

1. Shut off the gas to the appliance.
2. Extinguish any open flame.
3. If odor continues, immediately call your gas supplier or the fire department.

C. Use only a proper key to turn the gas line valve. Never use tools. If the valve will not turn, **DO NOT** try to repair it. Call a qualified professional service technician. Force or attempted repair may result in fire or explosion.

---

1. **STOP!** Read the safety information above.
2. Ensure the key valve is completely in the **OFF** position before beginning lighting sequence.
3. Lay a lighted long-stem match on the surface of the decorative media near the burner (**do not hold the match in your hand)** or use a lighted long-necked butane lighter (Fig. 21-1).
4. **Once the match is burning and in position,** turn the key valve counter-clockwise a 1/4 turn to the **ON** position (see Fig. 21-2). Your burner should light.

WARNING: If the burner does not light within (5) seconds of turning on the key valve, immediately turn the key valve clockwise a 1/4 turn to the **OFF** position.

Wait approximately five (5) minutes to clear out any gas, and repeat steps 3-4 above.

If your burner fails to light again, turn the key valve clockwise a 1/4 turn to the OFF position and contact your dealer or gas supplier.

Note: The flame height can be adjusted via the key valve.

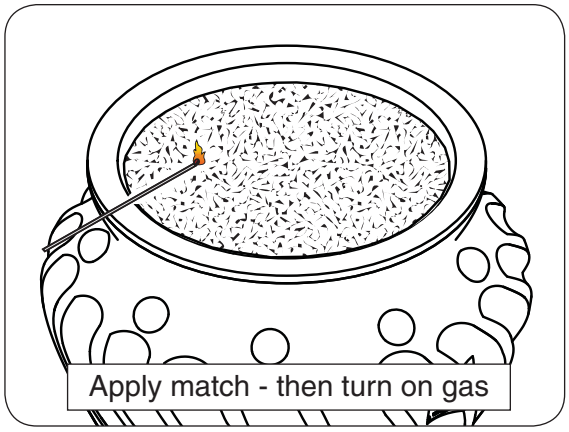

Fig. 21-1

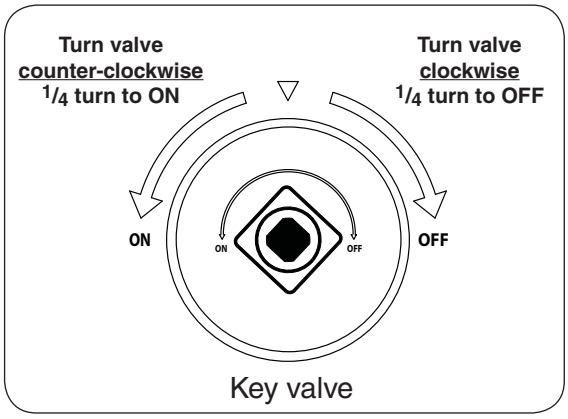

Fig. 21-2

TO SHUT OFF GAS TO THE APPLIANCE

To extinguish your gas burner, turn the key valve clockwise a 1/4 turn to the **OFF** position (see Fig. 21-2). Be sure the key valve is turned fully off to avoid any gas leakage.

INSTRUCTIONS D'ALLUMAGE - MODÈLE DE VANNE CLÉ

POUR VOTRE SÉCURITÉ, LIRE AVANT D'ALLUMER

AVERTISSEMENT: SI VOUS NE SUIVEZ PAS CES INSTRUCTIONS À LA LETTRE, UN INCENDIE OU UNE EXPLOSION POURRAIENT S'ENSUIVRE, CAUSANT DES DOMMAGES MATÉRIELS, DES BLESSURES OU DES PERTES DE VIE.

A. AVANT D'ALLUMER, sentez tout autour de l'unité de surface pour le gaz. Assurez-vous de sentir près du plancher, car certains gaz sont plus lourds que l'air et se déposent sur le sol.

B. QUE FAIRE SI UNE ODEUR DE GAZ

1. Coupez le gaz à l'appareil.

2. Éteindre toute flamme nue.

3. Si l'odeur persiste, appelez immédiatement votre fournisseur de gaz ou le service des incendies.

C. Utilisez uniquement une clé propre à tourner la vanne de la conduite de gaz. Ne jamais utiliser d'outils. Si la vanne ne tourne pas, NE PAS essayer de le réparer. Appelez un technicien de service qualifié. Force ou une tentative de réparation pourrait provoquer un incendie ou une explosion.

---

1. **ARRÊT!** Lire les consignes de sécurité ci-dessus.
2. S'assurer que le robinet est complètement clé en position **OFF (ÉTEINDRE)** avant de séquence d'éclairage à partir.
3. Poser une allumettes à tige longue éclairé sur la surface des médias décoratifs près du brûleur **(ne pas tenir le match en main)** ou utiliser un briquet au butane long cou éclairé (Fig. 22-1).
4. **Une fois que le match est en feu et en position,** tournez la vanne clé sens anti-horaire d'un tour à la position **ON** (sur) 1/4 (voir Fig. 22-2). Votre brûleur devrait s'allumer.

AVERTISSEMENT: Si le brûleur ne se allume pas dans les cinq (5) secondes de tourner sur la vanne clé, tournez immédiatement la vanne clé vers la droite d'une tour à la position **OFF** (éteindre) 1/4.

Attendez environ cinq (5) minutes pour laisser échapper tout le gaz, et répétez les étapes 3-4 ci-dessus.

Si votre graveur ne s'allume à nouveau, tourner la soupape clé vers la droite d'une tour à la position OFF (éteindre) 1/4 et contactez votre revendeur ou fournisseur de gaz.

Note: La hauteur des flammes peut être réglée par la vanne clé.

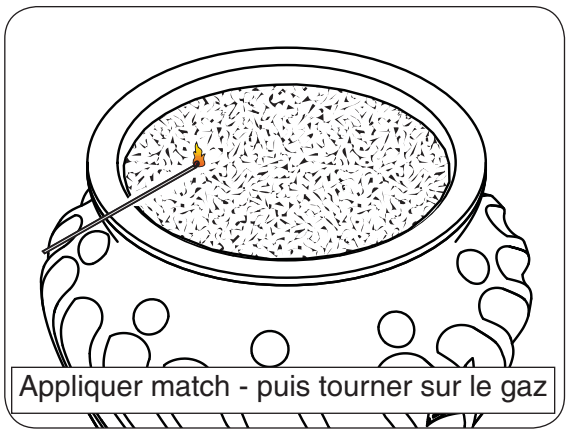

Fig. 22-1

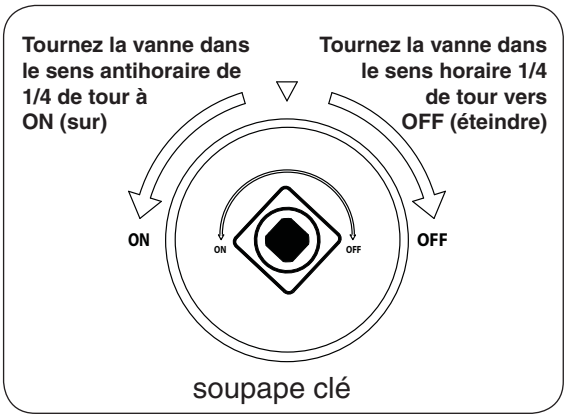

Fig. 22-2

POUR ARRÊTER LE GAZ À L'APPAREIL

Pour éteindre votre brûleur à gaz, tourner la soupape clé vers la droite d'une tour à la position **OFF** (éteindre) 1/4 (voir Fig. 22-2). Assurez-vous que la vanne clé est tournée entièrement au large pour éviter toute fuite de gaz.

SERVICING AND CLEANING

Each installation site for any unit presents its own unique combustion environment. Specific factors such as weather, wind currents, yard debris, altitude, drafts, the size of the surrounding area, all have an influence on the proper operation of the unit. A normally operating unit will demonstrate the following characteristics:

- A lively, realistic yellow flame
- Odor-free

If the flame is not clean (identifiable by excessive sooting on the decorative media), refer to the information below. Some soot on the media may occur and should not be a concern unless excessive.

- Cover your unit whenever it is completely cool and not in use, and follow the guidelines below at least annually.

ANNUAL CLEAN / INSPECTION GUIDELINES

The unit and the installation must be inspected annually. Refer to these instructions for details. Performing these procedures will ensure proper operation, appearance, and safety. WEAR GLOVES.

If maintenance is required, it must be done by a qualified professional service technician.

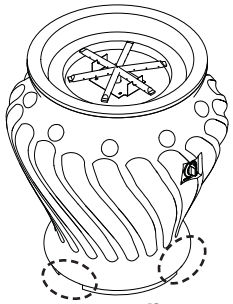

- Always shut off the gas to the unit while performing service work.
- Allow the unit to cool before servicing.
- The entire burner system should be inspected regularly:

  Excessive debris can build up on this unit from leaves, dirt, or other debris. It is critical that all control components, burners, vent openings, and the surrounding area be kept clean and free of all obstructions.

  Examine that all components are properly assembled / installed as instructed in this manual.

  Ensure that all decorative media is properly placed as instructed in this manual.
- The burner assembly must be replaced prior to the unit being put into operation if it is evident that the burner is damaged. Contact your local dealer for replacement parts.
- DO NOT use substitute materials when replacing any components of the appliance.
- **Keep the vent openings and surrounding area of the unit clean and free of obstructions at all times.**
- Periodically perform visual checks of the burner flames . The burner flames should be blue at the base with a combination of blue/yellow at the body and tips. Contact a qualified professional service technician for maintenance.
- **To maintain the concrete components,** see the CONCRETE CARE section for details.
- Any guard or other protective device removed for servicing the appliance shall be replaced prior to operating appliance.
- Verify proper operation after servicing.

(your model and design may vary)

Keep surrounding area and vent openings clear for proper venting

Fig. 23-1

CAUTION: HOT DURING OPERATION AND AFTER USE. Children must be supervised when in the vicinity of this appliance. Serious injury may occur! Children must be alerted to the hazard of high surface temperatures and should stay away to avoid burns or clothing ignition.

CONCRETE CARE

As with any surface, concrete components require regular maintenance and care. Certain guidelines must be followed to preserve the concrete's appearance and structural integrity.

- **Scratches may occur due to usage.** To minimize, avoid striking or dragging heavy, rough, or sharp objects across the unit.
- **Spotting and hairline cracks may occur due to nature of product and are not considered a manufacturing defect.**
- **Concrete products are porous and susceptible to discoloration from liquids**. Avoid allowing water (or any liquid / substance) to stand on the surfaces of the unit.
- **To clean the concrete, first wash with a mild soap and water solution. For stubborn stains, a vinyl brush may be used. Allow to dry. Annually, follow up with a masonry sealer in order to preserve the finish.**
- It should be noted that, like natural stone, concrete products will develop a patina when left outside. No two concrete products are identically the same and the finish will vary.
- **An optional fabric cover is available to protect your unit when cool and not in use (select models).** Contact your local dealer for ordering information.

FUEL CONVERSION KITS

A certified kit is available from the manufacturer to convert your appliance from natural gas to L.P. or vice versa. Contact your dealer for ordering information.

Follow the instructions provided with the kit when converting.

TROUBLESHOOTING

If you have trouble with your unit, please use this list to identify the problem. By trying one or more of the solutions to the probable cause, you should be able to solve the problem. If this list does not address your present problem, or if you have other technical difficulties with your unit, please contact your local dealer or visit our web site at *www.rhpeterson.com.*

SYMPTOM	PROBABLE CAUSE	CORRECTIVE ACTION
Burner will not turn on	**1.** Gas not reaching appliance **2.** Air in gas line	**1.** Check gas supply and gas shut-off valve. **2.** Purge air from gas line.
Unit overheating or poor combustion	**1.** Vent openings / surrounding area blocked with debris	**1.** Clean vent openings and surrounding area of all obstructions.
Low flame	**1.** Low gas pressure **2.** Low gas pressure/flame (propane) **3.** Propane tank running low (if applicable)	**1.** Check gas pressure (Read E-F of PRE-INSTALLATION AND PREPARATION SAFETY GUIDELINES section, & check with local gas company). **2.** Shut off all valves, including propane tank, and follow lighting instructions exactly. (See important note* below.) **3.** Fill tank completely.
Low flame or too high flame	**1.** Using natural-gas burner on propane gas or propane burner on natural gas	**1.** Ensure proper gas type. The gas supply used may not be the same as that stated on the unit rating plate. Shut down immediately to verify, and if necessary contact your local dealer. (The unit may be converted to the gas type of the gas supply, IF PERMITTED.)
Flame lifts off the burner assembly	**1.** Unit exposed to high-wind conditions	**1.** Ensure that the unit is installed in an area that is less susceptible to high wind conditions. **DO NOT operate in high-wind conditions.**
Flame height drops when unit is in operation	**1.** Low gas pressure (due to improper gas supply line)	**1.** Check gas supply line and gas pressure (Read E-F of PRE-INSTALLATION AND PREPARATION SAFETY GUIDELINES section, & check with local gas company).
Burner lights but will not stay lit	**1.** Low gas pressure **2.** Unit exposed to high-wind conditions **3.** Clogged burner ports **4.** Faulty valve or regulator	**1.** Check gas pressure (Read E-F of PRE-INSTALLATION AND PREPARATION SAFETY GUIDELINES section, & check with local gas company). **2.** Ensure that the unit is installed in an area that is less susceptible to high wind conditions. **3.** Clean burner ports. **4.** Contact a qualified professional service technician and the local dealer.
Burner flashback or flame burning out of orifice	**1.** Clogged burner ports **2.** Clogged burner orifice	**1.** Clean burner ports. **2.** Clean burner orifice.

Note: *Propane tanks are equipped with a safety shutdown device that may cause low or no gas/flame at the burners if operating and lighting instructions are not followed exactly. **If you suspect the propane tank safety shutoff is in effect:** 1) Shut off unit's valve. 2) Shut off tank valve. 3) Open and close unit's valve. 4) Open tank valve. 5) Follow the LIGHTING INSTRUCTIONS. Lighting instructions are located in your owner's manual and printed on the unit's label plate. Lighting instructions are located in the owner's manual. If the problem persists, continue troubleshooting, or contact your local dealer or distributor for assistance.

WARRANTY

AMERICAN FYRE DESIGNS BY R. H. PETERSON CO.
LIMITED WARRANTY

Robert H. Peterson Co. (“RHP”) warrants your American Fire Designs product to be free from defects in material and workmanship.

American Fyre Designs (“AFD”) exterior Glass Fiber Reinforced Concrete (GFRC) fire features (“products”) and burners are warranted for **THREE (3) YEARS**.

All AFD valves, electrical components, accessories and controls are warranted for **ONE (1) YEAR** (excluding batteries, wind guards and screens).

This warranty **does not** apply to: product damage caused by burning wood or any fuel other than natural gas or propane; or damage or discoloration to product used in high wind conditions.

A COPY OF YOUR SALES SLIP FOR PROOF OF PURCHASE IS REQUIRED

This warranty applies to the original purchaser for products which are installed in the United States or Canada and which are operated and maintained as intended for single family residential usage. This warranty is valid only with proof of purchase, shall commence on the date of purchase, and shall terminate (both as to original and any replacement products) on the anniversary date of the original purchase of the product stated on the above schedules.

This warranty covers defects in material and workmanship. This warranty **does not** cover parts which become defective as a result of negligence, misuse, use not in compliance with the Owner’s Manual/Installation Instructions, accidental damage, improper handling, improper storage, improper installation, lack of required routine maintenance (as specified in the Owner’s Manual/Installation Instructions), electrical damage, local gas impurities or failure to protect against combustibles. Product must be installed (and gas must be connected) as specified in the Owner’s Manual/Installation Instructions by a **qualified professional installer**. Modifications to products which are not specifically authorized will void this warranty. Accessories, parts, valves, remotes, etc. when used must be Peterson products or this warranty is void. Warrantied items will be repaired or replaced at Peterson’s sole discretion. This warranty **does not** apply to rust, corrosion, oxidation, or discoloration unless the affected part becomes inoperable.

This warranty **does not** cover labor or labor related charges, except as provided by separate specific written programs from the Peterson Co. All repair work must be performed by a qualified professional service person and requires prior approval of Peterson.

Peterson may require the defective product or part to be returned to the factory to determine the cause of failure. Peterson will pay freight charges if the product or part is determined to be defective. This warranty does not cover breakage in shipment from our (Independent) distributor to its customer if the damage is determined to have occurred during that shipment.

This warranty specifically excludes liability for **indirect**, **incidental**, or consequential damages. Some states and provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusion may not apply to you. This warranty gives you specified legal rights, and you may have other rights that vary from state to state or province.

For additional information regarding this warranty, or to place a warranty claim, contact the R. H. Peterson dealer where the product was purchased.

TO REGISTER YOUR PRODUCT ONLINE GO TO: WWW.RHPETERSON.COM, AND CLICK ON PRODUCT REGISTRATION. THANK YOU FOR YOUR PURCHASE.
